

## ECONOMIC THEORY FOR DUMMIES

by Amund Sjølie Sveen

- Tech rider (July 2014)

a performance in lecture-style that can be staged in theater, black box, auditorium, gallery or other space.

### TECHNICAL/PRACTICAL NEEDS:

#### Multimedia:

- projector and VGA cable (VGA input 1024x768 resolution from laptop on stage)
- screen or white wall to project on - minimum 4x3 meters *projection area* (larger is even better). In halls over ca 150 seats: 5 meters wide projection area

#### Sound:

- wireless headset mic for voice
- 2 lines from stage mixer / laptop
- 1 monitor speaker (only needed in large halls)

Sound technician needed for rigging and running show.  
Full PA system with subwoofers needed.

#### Light:

- general cover of stage podium / table with instruments and performer (without spilling on screen)
- a few adjustments needed during show (very simple, just up and down)

#### Stage:

- Stage podium (or table solid enough to carry a person) 1 x 2 meters, 80 cm legs, for computer, instruments etc.
